

# Alexandr Cosov

**Front-End Developer** with a strong expertise in **JavaScript** and **TypeScript**, combined with extensive hands-on experience in modern frameworks and libraries like **React** and **Apollo GraphQL**. Proficient in crafting responsive and high-performance user interfaces using **HTML**, **CSS**, and **SASS**. Committed to continuous self-improvement in both technical and interpersonal skills. Known for being an adaptable team player with excellent communication abilities, making collaboration seamless and productive.

## WORK EXPERIENCE

### Front-End Engineer

Toptal | Jun 2023 – Oct 2024 | Remote

- Spearheaded the extraction of a chat system from an existing project, transforming it into a reusable component, improving efficiency and scalability across multiple applications.
- Co-led the development of "HireGlobal," a new service offering, and successfully built the client-facing portal, enabling streamlined access for users.
- Improved continuous integration (CI) processes by optimizing GitHub Actions workflows, reducing test run time on PRs and increasing overall development speed.
- Modernized state management by migrating from Redux to Zustand, improving performance and reducing complexity in application architecture.

### Junior Front-End Engineer

Toptal | Feb 2022 – Jun 2023 | Remote

- Led performance optimization initiatives for websites, resulting in faster load times and enhanced user experience.
- Played a key role in the creation of the "Managed Delivery" offering, contributing to the strategy and technical implementation.

### Front-End Engineer Intern

Toptal | Aug 2021 – Feb 2022 | Remote

- Refactoring old class components to the functional ones.
- Pushed the initiative to run Front-End locally against the Staging Back-End via proxy.
- Migrated unit tests from Enzyme to React Testing Library.
